PROJECTS :-

- College Management system** (02/2019 – 06/2019)
 The system we (a group of four members) developed was for providing a platform where college administrators can keep records of their student and teachers and display all the information of the college.
Tools used: - PHP, HTML, CSS, MySQL
- Online Examination System** (02/2020 – 02/2020)
 The system we (a group of four members) developed was for providing a platform where students can take their examination online at the schedule maintained by the college.
Tools used: - PHP, JavaScript, HTML, CSS, MySQL
- Lagan: A matchmaking partner** (02/2021 – 08/2021)
 It was the final project of our college. Facing different problems regarding new technology and language, our project was done.
 The project's objective is to provide a platform where the users can search for their respective bride or groom and match them based on some preferences to continue further.
Tools used: - JSP, SPRING MVC, JavaScript, HTML, CSS, MySQL
